

Crystal 2.1

Crystal 2.1

Profili alluminio
Cristallo trasparente 8 mm
Supporto acciaio inox
Altezza 200 cm
Trattamento anticalcare

Crystal 2.1 è l'idea di arredo per un bagno moderno che passa per il concetto di essenzialità. Il tratto caratteristico del modello è la quasi assenza di profili e la modularità delle sue soluzioni doccia. Il prodotto nasce come parete walk-in, dove la lastra di cristallo temperato da 8 mm incontra solamente il braccio di supporto a muro, in un sistema che interpreta la parete doccia come uno spazio libero di immediato accesso. La linea "in&out" si completa con il corner angolare in alluminio brillante, che permette installazioni ad angolo, con il braccio di supporto a "T" per formati doccia generosi e con la paretina mobile girevole da 6 mm, con sistema di sollevamento per agevolare rotazione e apertura, per ingrandire ed estendere lo spazio doccia. Crystal 2.1 si completa anche con la nuova porta battente, per chi vuole coniugare il minimalismo di una parete walk-in ad un concetto di spazio doccia chiuso. La porta battente è completa di guarnizione magnetica angolare, guarnizione sottoporta e profilo sottoporta salvagoccia. Per tutte le composizioni i profili e i relativi cristalli sono reversibili e regolabili nel particolare di ancoraggio a muro di 2 cm; per questo motivo la serie risulta adatta anche ad installazioni a filo pavimento. L'altezza di riferimento è di 200 cm. E' fornito di serie con trattamento anticalcare Luxury cleaning incluso, è declinato in differenti misure e la soluzione walk-in disponibile a richiesta "su misura".

Aluminium profiles
 8 mm clear glass
 Stainless steel arm
 200 cm height
 Luxury cleaning

Crystal 2.1 is the idea of furniture for a modern bathroom that passes through the concept of essentiality. Model characteristic feature is the almost absence of profiles and the modularity of its shower solutions. The product was born as a walk-in wall, where the 8 mm tempered glass pane meets only the wall support arm, in a system that interprets the shower wall as a free space of immediate access. The "in & out" line is completed with the polished aluminium angular corner, which allows for corner installations, with the "T" support arm for generous shower formats and with the 6 mm side pivot door, with a lifting system to facilitate rotation and opening, to enlarge and extend the shower space. Crystal 2.1 is also completed with the new pivot door, for those who want to combine the minimalism of a walk-in wall with the concept of a closed shower space. The pivot door comes complete with angular magnetic gasket, bottom waterproof seal and bottom waterproof aluminium profile. For all the compositions, the profiles and their glasses are reversible and adjustable in the particular of anchorage to the wall of 2 cm; for this reason the series is also suitable for flat floor installation. The reference height is 200 cm. It is supplied as standard with Luxury cleaning treatment included, it is available in different sizes and the walk-in solution is available "on demand".

NOTE

Il braccio di supporto da 100 cm è fornito di serie nelle pareti standard Crystal 2.1, è snodabile e può essere accorciato. Per la composizione standing è necessario aggiungere un altro braccio di supporto da 100 cm non compreso nella confezione. Il braccio di supporto da 80 cm è necessario per il collegamento a "T" e non è fornito di serie.

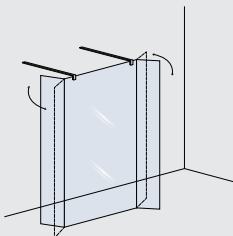

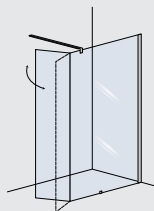

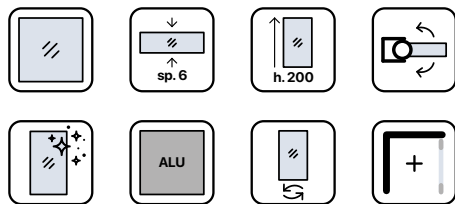

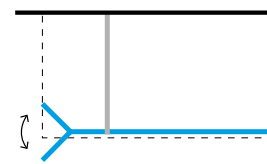

Stainless steel glass arm 100 cm is included in Crystal 2.1 standard sides, it is adjustable and it can be reduced. For standing composition it is necessary to add another stainless steel glass arm 100 cm that it is not included in the package. Stainless steel glass arm 80 cm has to be used for "T" connection, and it isn't included in standard sides.
